

ONE PARTNERSHIP

COMPLETE CUTTING-EDGE SOLUTIONS

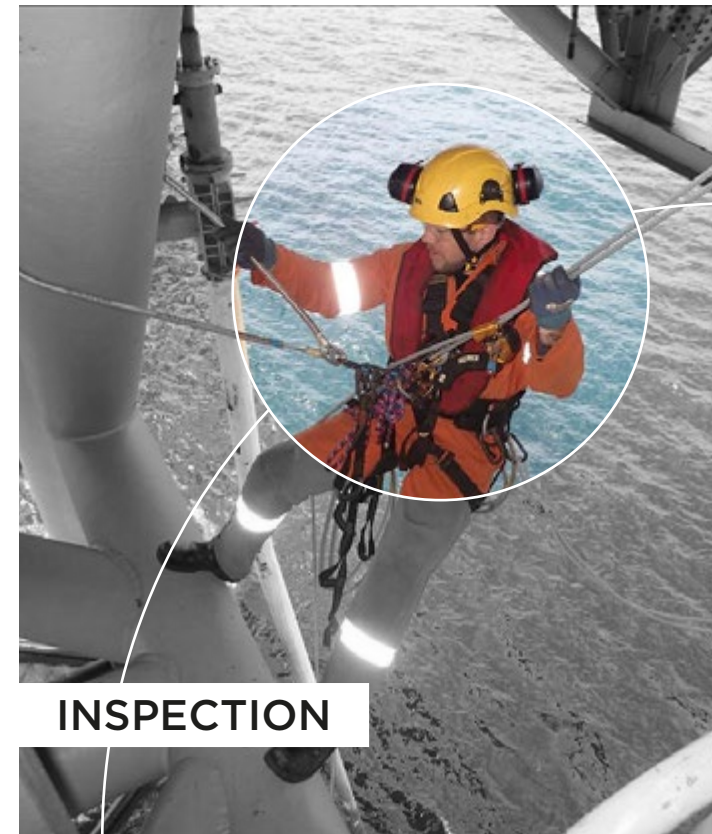

TWO INDUSTRY LEADERS ONE INTEGRATED SOLUTION FULL LIFECYCLE COVERAGE

Applus+ and Core Cut have joined forces to deliver a powerful, end-to-end service offering for the offshore, marine, and petrochemical industries.

This partnership combines leading expertise in engineering, inspection, rope access, rigging, precision cutting, and advanced HP & UHP water jetting.

Our multiskilled teams provide flexible, efficient solutions that reduce interfaces, lower costs, and accelerate project delivery. From preventative maintenance to life extension, we maximise asset performance while minimising downtime.

We deliver safe, seamless solutions that protect value at every stage of the asset lifecycle right through to decommissioning.

INSPECTION

REPAIR & REMEDIATION

DECOM

MAINTENANCE

OFFSHORE OIL & GAS

Inspection / Maintenance / Repair Orders

Our multiskilled team can provide a full turnkey solution for accessing, inspecting, cleaning, cutting, repairing or removing pipework, vessels, and tube bundles.

Decommissioning

Our multiskilled specialist services are a natural fit for decommissioning of offshore platforms and floating production storage and offloading facilities. Reducing POB demands and providing efficient solutions to complex challenges such as leg cutting, module separation, conductor cutting, cutting and removal of redundant risers & caissons.

Our range of offshore services include:

- Rope Access
- V-Deck modular access platforms.
- Rigging & Lifting
- Diamond Wire Cutting
- UHP Abrasive Cutting
- Clamshell Cutting
- Underwater Diamond Wire Cutting
- Plasma Cutting
- UHP / HP Water Jetting
- NORM Monitoring
- Specialist Coatings and Composite Repairs

MARINE & QUAYSIDE INFRASTRUCTURE

Removal of Redundant Infrastructure

Both Applus+ and Core Cut have a strong track record of delivering complex civil, construction and marine projects across the UK.

Our multiskilled specialist teams are equipped with the latest technology to provide safe and efficient solutions for:

- Concrete repairs and controlled demolition of concrete quayside infrastructure.
- Cutting & removal of dolphins, pipework, and jetty infrastructure, and piles.
- Removal of marine growth.

Our advanced access and rigging solutions reduce the requirement for costly vessel based or quayside cranes.

Our range of marine and quayside services include :

- Inspection
- Rope Access
- V-Deck modular access platforms.
- Rigging & Lifting
- Diamond Wire Cutting
- UHP Abrasive Cutting
- Hydrodemolition
- Robotic Demolition
- Clamshell Cutting
- Underwater Diamond Wire Cutting
- Plasma Cutting
- UHP / HP Water Jetting
- Specialist Coatings

INDUSTRIAL & PETROCHEMICAL

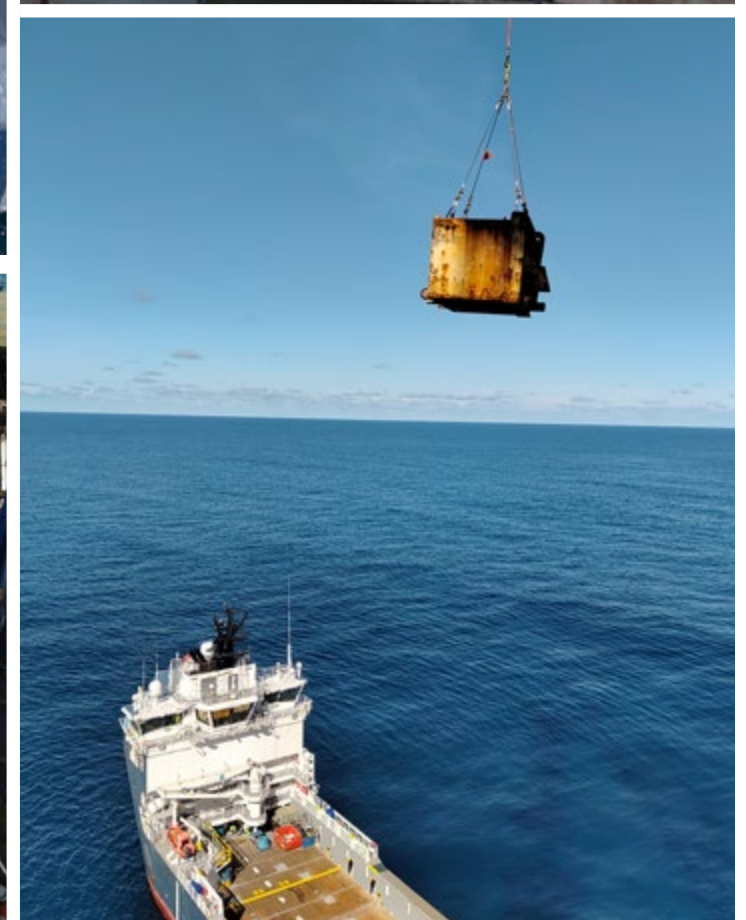

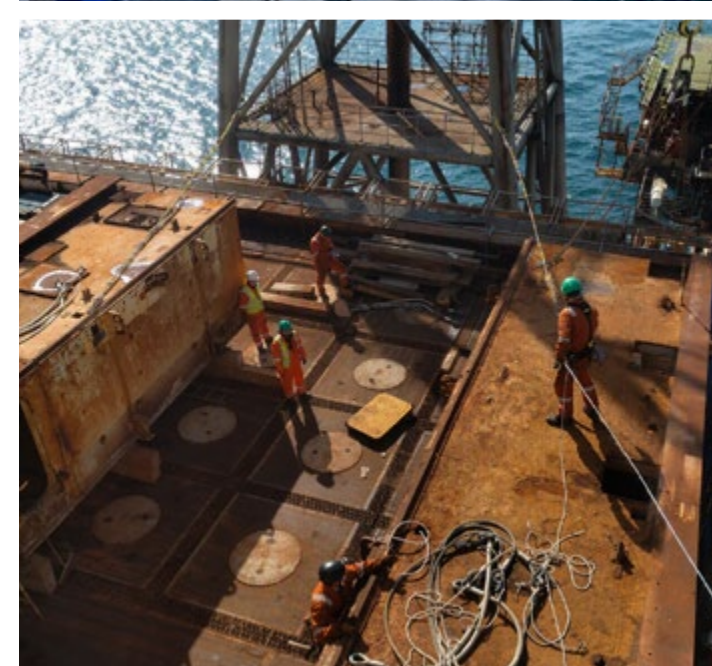

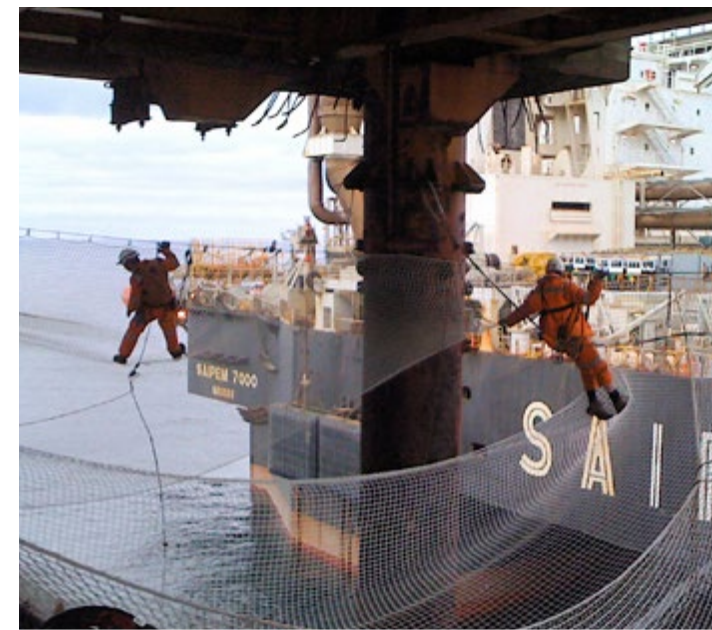

From commissioning to decommissioning.

With locations across the UK and overseas our partnership provides fast responses to complex asset challenges that threaten the integrity and operations of your plants. Our multiskilled specialist teams reduce downtime and asset running costs by providing fit for purpose technology-based solutions.

With decades of experience working in hazardous environments, our fully retained workforce have the know-how and technology to safely and efficiently deliver a range of critical services giving you complete peace of mind

Our range of services include:

- Inspection
- Rope Access
- V-Deck modular access platforms.
- Rigging & Lifting
- Diamond Wire Cutting
- UHP Abrasive Cutting
- Clamshell Cutting
- Underwater Diamond Wire Cutting
- Plasma Cutting
- UHP / HP Water Jetting
- NORM Monitoring
- Specialist Coatings and Composite Repairs
